Reporting to: Manish Sirohi

Job description: We require a dedicated Full Stack Developer for the 9th International Health & Wellness Expo (IHWE) project. The project involves building and maintaining multiple web portals, admin panels, APIs, and automation modules with strict delivery timelines. The developer will be responsible for developing new features, fixing critical issues, optimizing application performance, integrating third-party services, and supporting deployment activities to ensure successful project execution.

KRA / responsibilities: Deliver project modules within defined timelines.

Develop scalable frontend and backend features.

Maintain clean, secure, and optimized code.

Collaborate with cross-functional teams.

Ensure high application performance and reliability.

Resolve production issues and perform continuous improvements.

Participate in deployment and release management.

Justification: Need developer for IHWE

Recruitment status: In Progress
